What is Boom 3D?

Boom 3D is a pro-audio enhancement app, which comes with amazing 3D surround sound that perfectly works on ANY headphones. It also has a dotingly crafted equalizer with bunch of presets, and magical audio effects for an all-round acoustic experience.

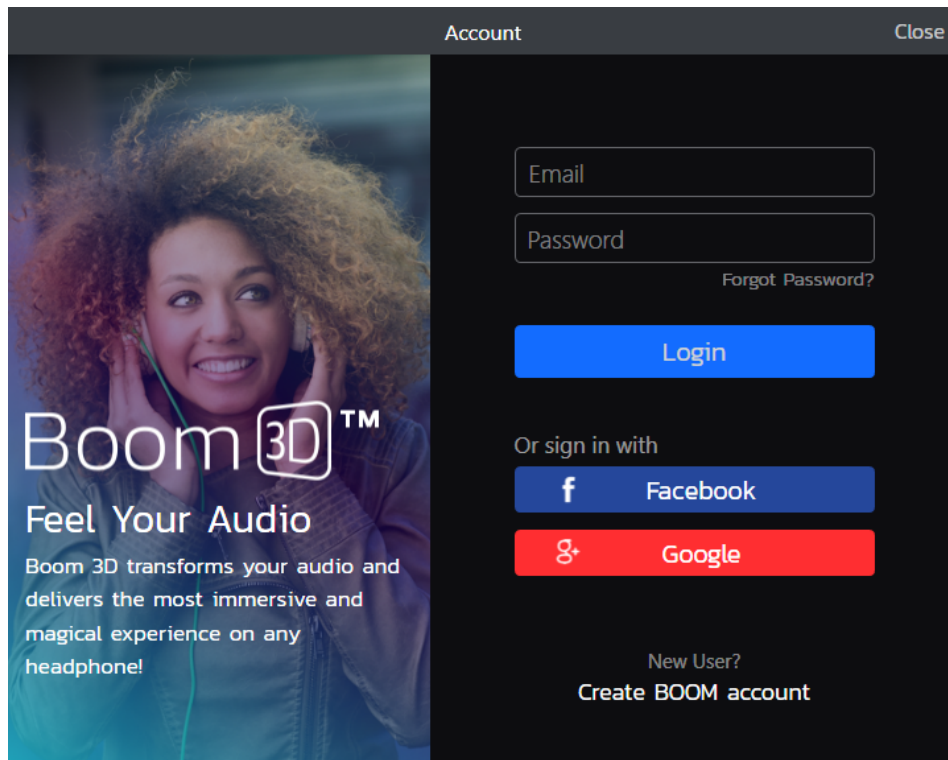

Boom 3D Installation Guide

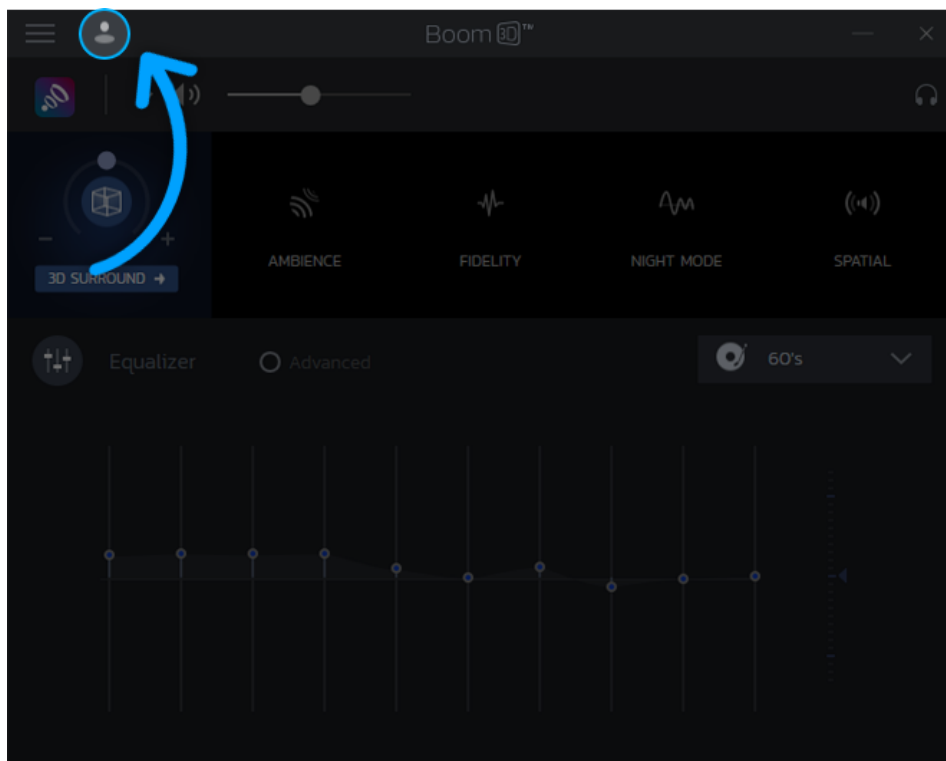

- After downloading the app, double click on the Boom Setup file from the downloaded location.
- Follow the installation steps and enjoy Boom 3D on Windows.

- Sign up using the email address that you've used to purchase Boom 3D or you can also sign up using your Facebook or Google account.

- If you have already purchased the app, have the trial version installed and signed up for Boom, simply click on the "Profile" icon at the top right corner of the app.

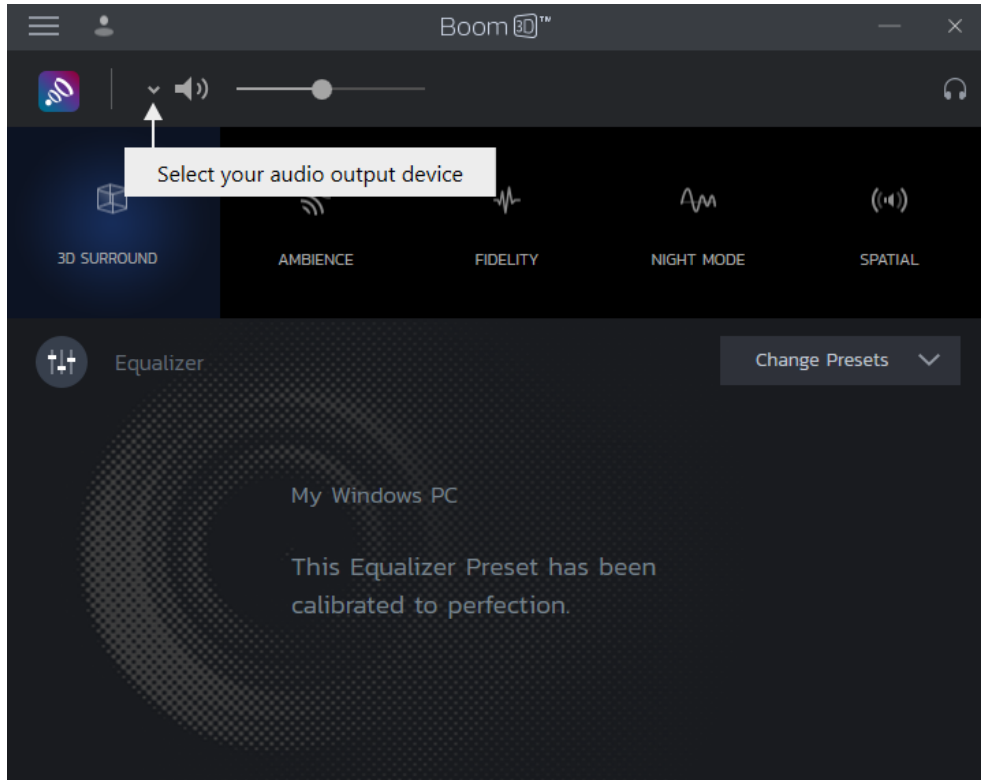

- Next, click on the "Restore Purchase" option. Please make sure that you've signed up using the same email address that was used to purchase Boom 3D.

• In case of any queries, write to us at boomwindows@globaldelight.com.

Note:

1. Please make sure you that you select the desired output device.

2. This version is compatible only with Windows 10 x64.

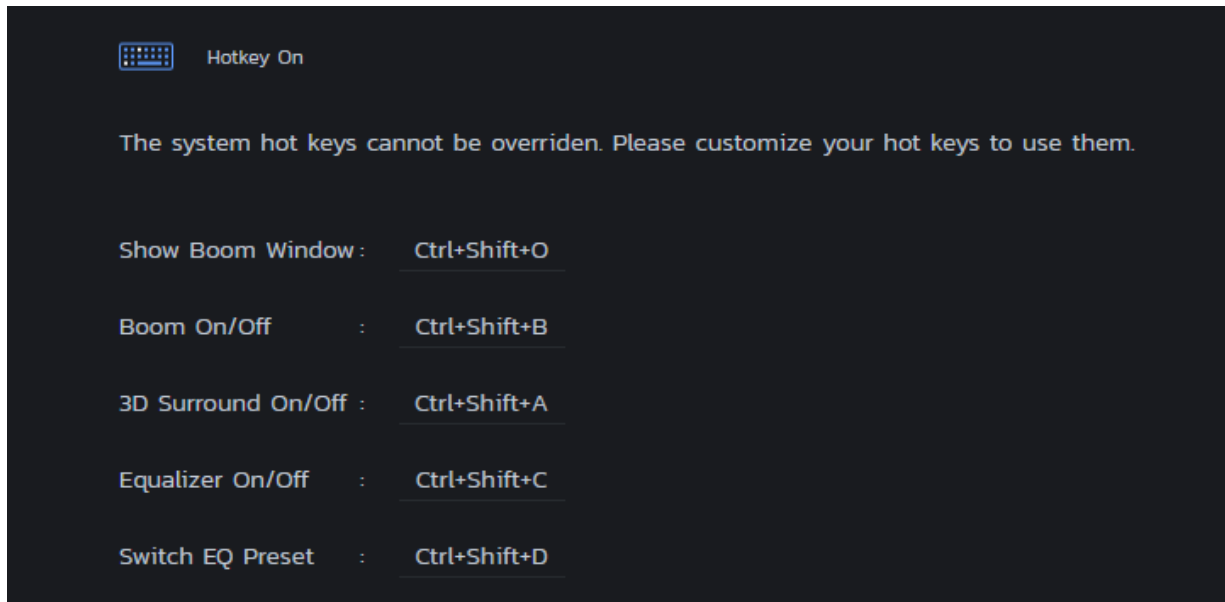

OS supports

Boom 3D is designed for Windows 10 x64 and later.

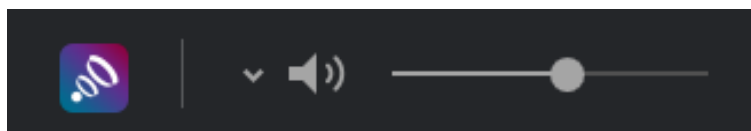

Hotkey Controls

Boom 3D offers alternatives to set key combinations as Hotkeys to instantly control a lot of the features. You can assign any Hotkey of choice from within Boom 3D's Settings.

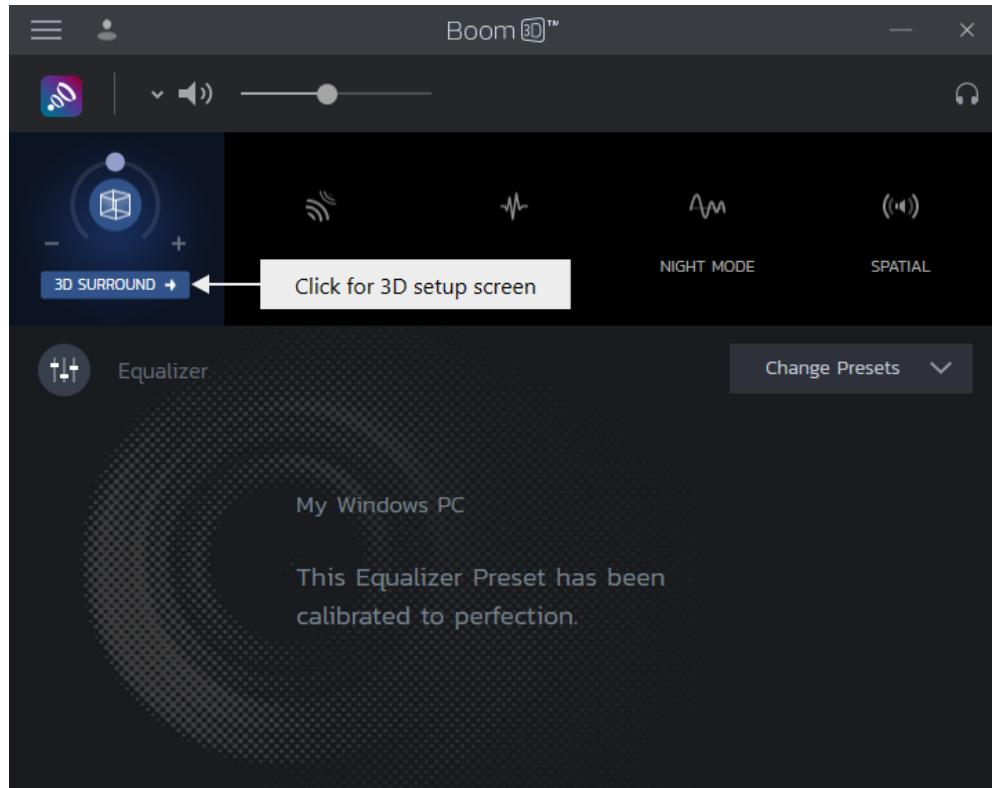

Volume Control

The Volume Control offers a complete control over the system's audio output through a neatly designed toggle bar. It helps you to easily adjust the volume that comes out of your Windows system.

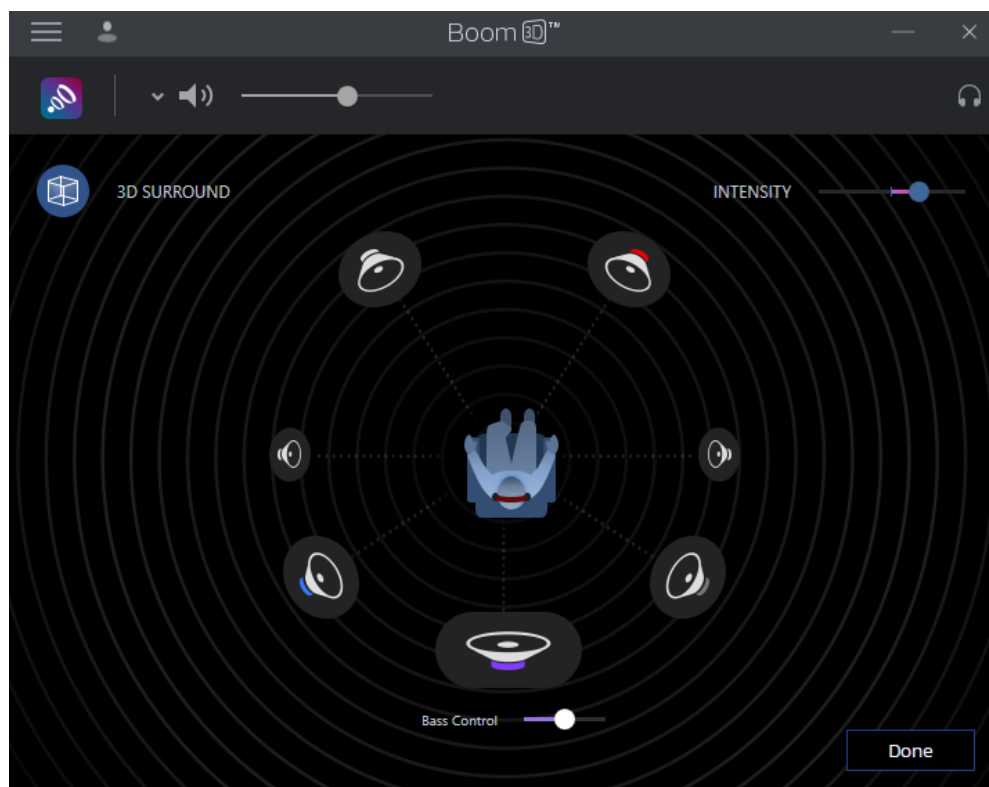

3D Surround Sound

- Click on the 'Arrow' icon next to the "3D Surround" to enter a menu where you can individually turn channels ON/OFF by tapping them. You can also adjust the bass and the intensity of your 3D surround with toggle-friendly sliders.

- The most significant feature of Boom 3D is the patent-pending 3D Surround Sound technology, which offers an immersive virtual surround sound experience that is entrancing and works on any headset!

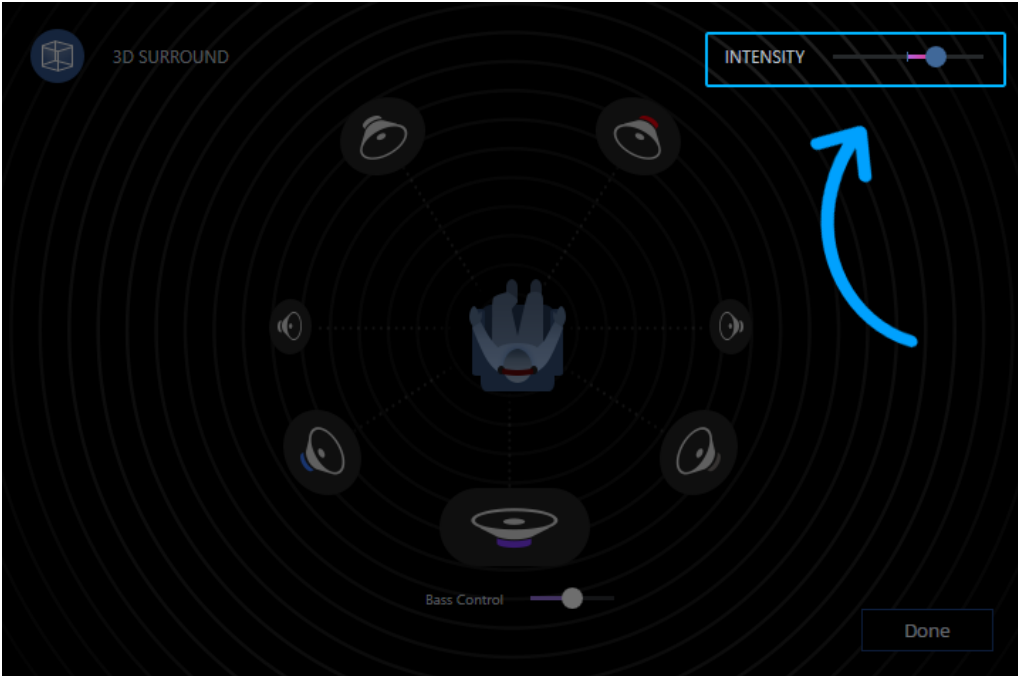

Please Note – To best experience the 3D surround sound effect, please plug-in a headset/headphones.

Intensity Slider

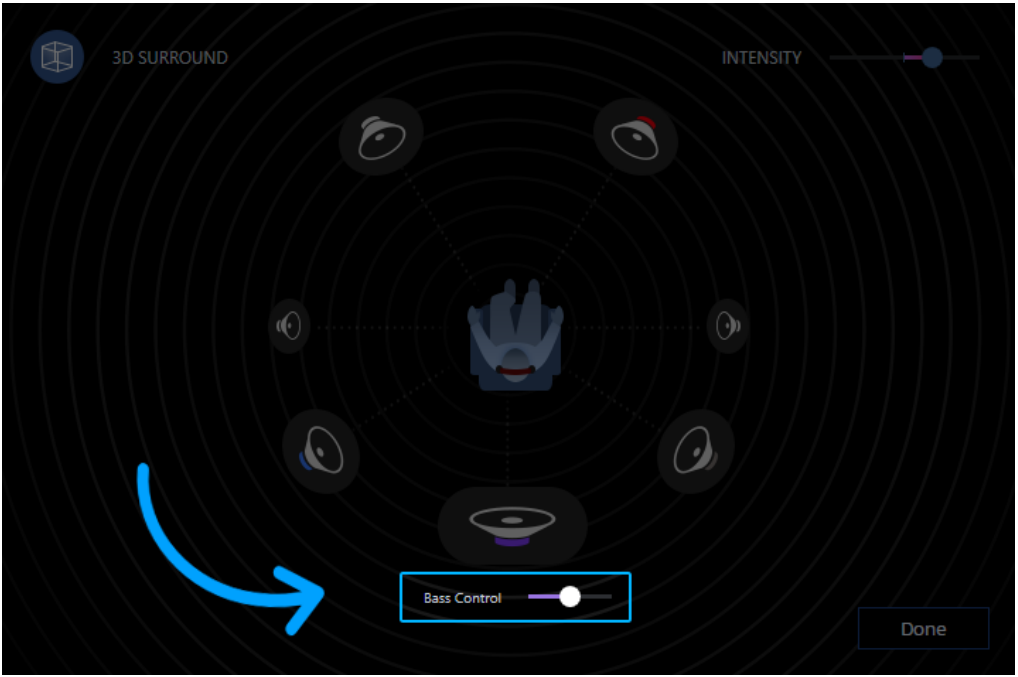

The Intensity slider renders the intensity of the surround audio output and gives more control to you.

Click on the 'Arrow' icon next to the "3D Surround" to enter 3D settings screen to find the Intensity slider. OR you can also change using curve slider on 3D icon shown in Boom 3D window.

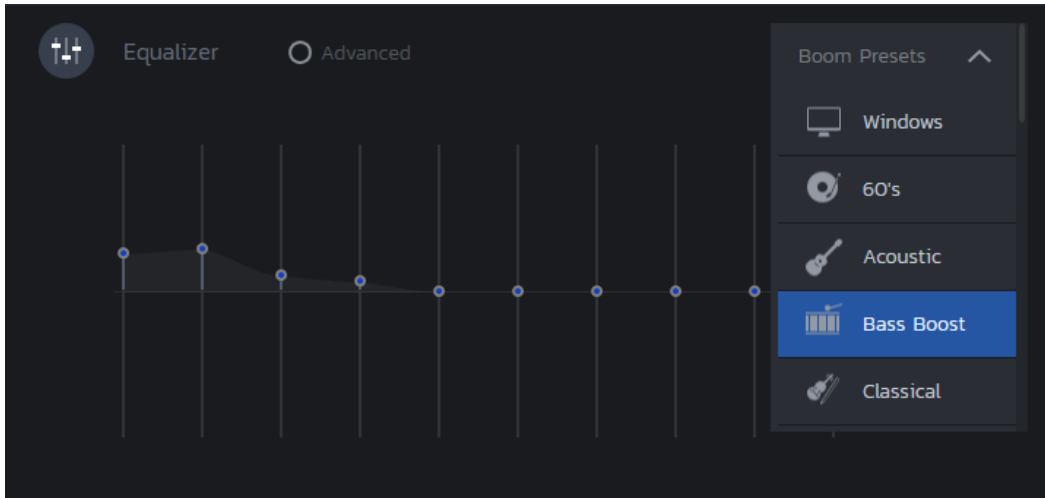

Bass Control

Click on the 'Arrow' icon next to the "3D Surround" to enter 3D settings screen. You'll find the Bass control slider below the sub-woofer at the bottom of the screen. Adjust the bass by sliding the toggle bar to find your optimum level.

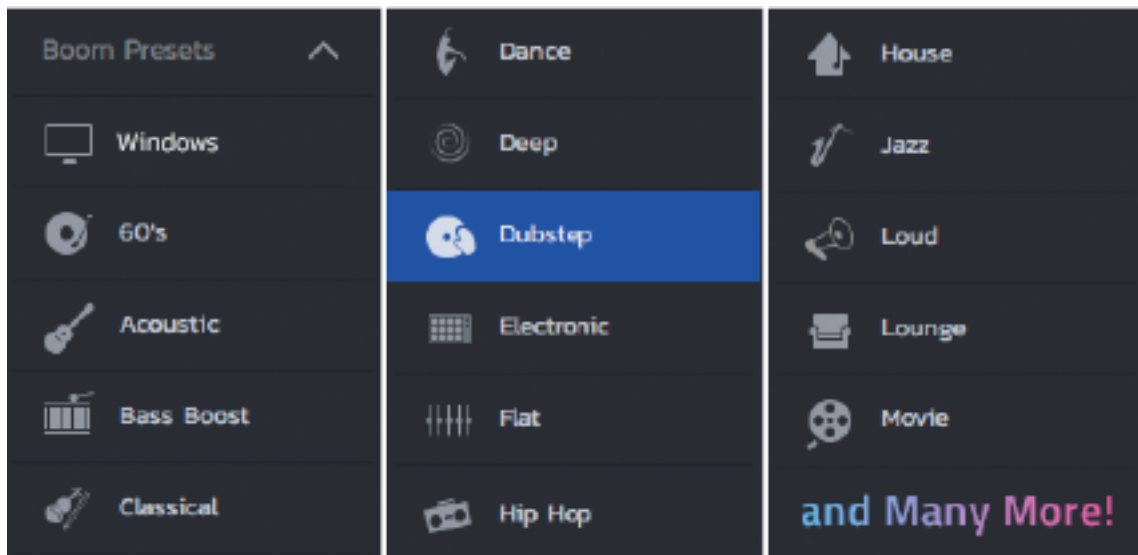

Equalizer And Presets

- Boom 3D has the most advanced Equalizers that allow you to modulate your audio with just the slide of your finger.

- The equalizer comes with a set of default presets for the most commonly used effects and has options to customize and create your own.
- Clicking on the dropdown list shows all the presets.

- On hovering the mouse pointer over or near any band in the equalizer, the frequency represented by that band is shown along with the markings, allowing for more precise adjustments in terms of values.
- Once you make a change in the equalizer settings by manually adjusting the frequencies, the preset selector changes to a section where you need to enter a new name for it. This gets added as a new custom preset. Custom presets can be selected or edited from the same drop-down list that shows the main Boom 3D presets.
- The Boom 3D Equalizer effect is applied to the overall system sound.

Audio Effects

We have included the below mentioned audio effects to heighten your audio experience:

AMBIENCE

FIDELITY

NIGHT MODE

SPATIAL

Ambience

Experience Ambience while feeling sound moving all around you with mind-blowing realism. Get an earful of notes from direction, making it sound like a live performance like no other.

Fidelity

Be here, there and everywhere with Fidelity. Listen to everything from music to dialogues to the falling of leaves with amazing detail, crispness, and clarity.

Night Mode

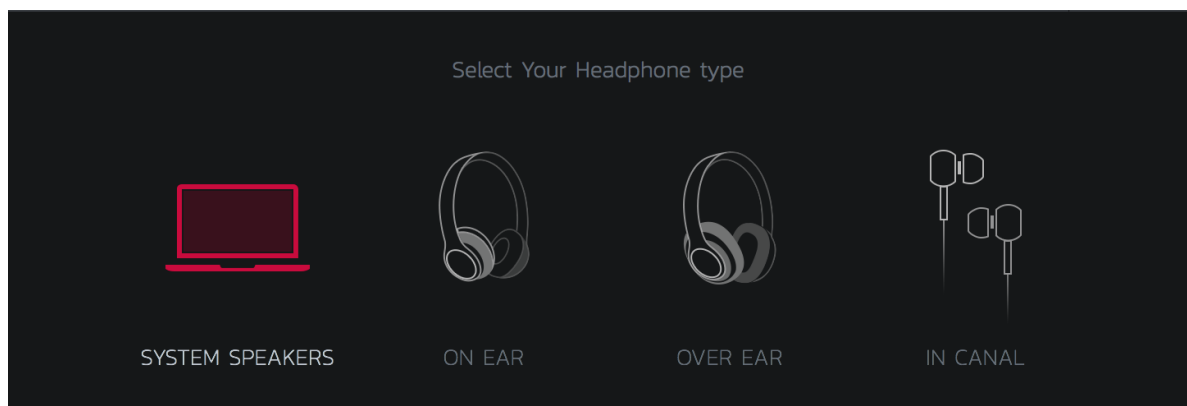

With just one click, Night Mode nominalizes the audio to produce sounds that aren't too loud or faint. This is perfect for action movies where certain sounds are loud while the rest are muffled.

Spatial

Be right at the center of your audio, while sound flows around you! Feel the illusion with the 'Spatial' effect; feel more realistic sound that seem to come from everywhere around you.

Select Your Headphone Type

Click on the "headphone" icon on the main app screen to choose the type of headphone you use so that Boom 3D can appropriately offer an output that sounds best.

Uninstall Boom 3D

- Go to Control panel
- Select Programs & Features
- Choose Boom
- Click on uninstall
